

VisscherHolland - MegaplastPower®

This triple layer agricultural sheeting is produced using state of the art extrusion technology. The machine contains internal cooling which cools down the sheeting faster, resulting in folds that remain strong, with 'metallocene' as the basic raw material.

MegaplastPower® has achieved the toughness and durability that you may expect from a top product. A triple layer plastic sheeting with excellent characteristics that easily outperforms traditional agricultural plastics every time.
